☙ From the Bridge

Today on Pacific Encounter, will spend the whole day making our way at sea. Do you know how we make for a smooth sailing? We are here to make your journey as comfortable as possible with the help of both the officers and crew onboard. The reduce the rolling movement of the ship, the vessel is fitted with stabilizer fins on our port and starboard sides of the hull, both beneath the waterline. These stabilizer fins move out laterally from the hull of the ship during passage and prevent any major rolling of the vessel during strong winds or high waves. This is one of the many ways of us guaranteeing our guests a pleasant and comfortable passage.

☀️ Good to Know
